Millennium Development Goals: 2009 Progress Chart

In the 2000 Millennium Declaration, United Nations Member States committed to building a better world in the 21st century. They reaffirmed that pledge at the 2005 World Summit and rallied around a common vision that focused on eradicating extreme poverty and hunger, extending primary education to every child, ensuring that women have the same opportunities as men, improving the health of mothers and children, averting new cases of HIV, tuberculosis and malaria, achieving a sustainable environment, establishing a new global partnership for development that engages the private sector and civil society organizations, and making the benefit of new technologies available to everyone.

These Millennium Development Goals are translated into 21 targets to be achieved mostly by 2015, starting from a baseline year of 1990. This chart presents an assessment of progress towards selected key targets on the basis of information available as of June 2009. Depending on the indicator, the latest available information could date back to as early as 2005 or as late as 2009.

The progress chart operates on two levels. The words in each box indicate the present degree of compliance with the target. The colours show progress towards the target according to the legend below:

- Already met the target or very close to meeting the target.
- Progress sufficient to reach the target if prevailing trends persist.
- Progress insufficient to reach the target if prevailing trends persist.
- No progress or deterioration.
- Missing or insufficient data.

* The available data for maternal mortality do not allow a trend analysis. Progress in the chart has been assessed by the responsible agencies on the basis of proxy indicators.

For the regional groupings and country data, see mdgs.un.org. Country experiences in each region may differ significantly from the regional average. Due to new data and revised methodologies, this Progress Chart is not comparable with previous versions.
